PROJECTS

• IPL Data Analysis Web App – Team Leader

Built using Flask, Python, and Pandas; performed ETL processes on raw IPL data (CSV) to create structured, visualized insights with player stats, season trends, and match predictions.

• Weather Forecast App – Team Leader

Developed Android app using real-time weather API with location-based data and responsive UI.

• JourneyGram – Team Leader

Created a tourism-focused platform, recognized at DIPEX 2025 regional level.
